

...coffee wakes up the world!

Award-winning product design

No sooner did it appear on the market than the WMF Presto won an award in one of the world's major design competitions, the »reddot design award«. The »winner 2005« label ranks it with the best in design and business. The NRW Design Centre will vouch for the quality of that label.

Self-explanatory display
The display guides you through the machine, step by step. It also shows all the operating sequences as well as useful information.

Perfect coffee specialties
From Espresso to Chococcino, the WMF Presto does everything simply at the touch of a button and all in perfect quality.

The new »Barista button«
The next brew can be made stronger or weaker as the client desires by means of this button on the touch screen.

Preheater option
Press this button to preheat all the parts in contact with the coffee. Hot Espresso, right from the very first cup.

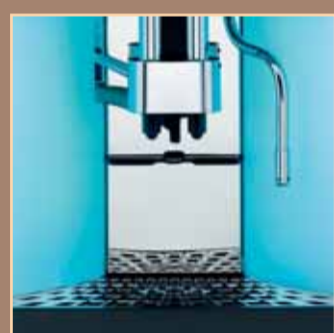

Hot chocolate with milk appeal
Almost any creation involving milk, coffee, water and chocolate can be produced with lots of fresh milk.

The intelligent WMF Presto
Alter the quantity of ground coffee and all the other settings will be adjusted automatically. For consistently good coffee.

Flexible water intake
The choice of a water tank or permanent connection to the water supply, according to requirements and circumstances, gives the WMF Presto even more flexibility.

Great design
Elegant by day and a shining example of attractive design ideas by night.

Handy manual input
A handy manual input allows a second type of ground coffee to be used, even in the value-for-money Economy Class (not possible with three product reservoirs).

»Economy« model
Even the entry level machine has lots of features that distinguish a WMF Presto. Brilliantly simple handling for top coffee specialties, with scope for custom upgrading at any time.

»Classic« model
The perfect coffee machine for those who want to use the "right" beans for each specialty. Individual roasting settings for Café Crème and Espresso ensure maximum coffee enjoyment.

»First Class« model
For those for whom only the best will do. All the features and options of a WMF coffee machine with that proverbial Made in Germany quality. The superior WMF Presto.

Slim build
A WMF Presto is only a little bit wider than the long side of an A4 page. So there's room for two even on the smallest counter.

Attractive side view
The new WMF Presto is good-looking from all angles. From the slim front view to the attractive side view – a real eye-catcher.

Milk powder-Topping
The WMF Presto can be fitted with the handy milk powder topping option (e.g. for business use).

Milk housing
Milk packs are not particularly attractive to look at. A special compartment (for 1-1.5 l) keeps them neatly out of sight.

Intuitive operation
The intuitive user guide is particularly useful in self-service mode. The clear design ensures the cup is automatically positioned in the centre.

Top for cost-effectiveness
Unique cost-effectiveness in this sector makes this the perfect choice for the price-conscious.

Automatic cleaning
and descaling at the touch of a button. That saves time and cuts operating costs.

Well thought-out reservoirs
The reservoirs can be closed before removal, to make cleaning and refilling very much easier.

Height-adjustable spout
The spout is easily adjustable to enable containers from 70 – 180 mm tall to be filled (200 mm on models without a chocolate or topping powder reservoir).

Large ground coffee hopper
The large capacity ground coffee hopper is centrally positioned for easy access.

Clever key allocation
Key labelling is as brilliantly simple as product allocation. Simply slip in the ready-made labels.

Easy maintenance
You can do the basic maintenance yourself. That means fewer visits from the WMF Service Engineer.

WMF
presto!

Espresso 2x Espresso			Cappuccino 2x Cappuccino
Cafe Creme 2x Cafe Creme			Milchkaffee Latte Macchiato
Choc Chococcino			Milchschaum Milch
